Backend: REST APIs, GraphQL, Serverless, Microservices, MySQL, Postgres, Redis, Authentication Cloud &

DevOps: AWS, Docker, GitHub Actions, CI/CD Pipelines, Agile Development

Testing: Jest, Unit Testing, Integration Testing, Automation, Debugging, TDD

Collaboration: Agile, Scrum, Jira, Product Collaboration, Cross-functional Pods, Mentorship

Professional Experience

Full Stack Software Engineer | SemanticBits - Remote | Mar 2022 - Present

- Delivered SaaS features using React, Node.js, TypeScript, GraphQL, MySQL, and AWS microservices. - Led full-stack feature development across multiple pods, partnering closely with product managers, designers, and cross-functional teams. - Built scalable backend services, REST APIs, and data models with strong focus on security, maintainability, and performance. - Enhanced CI/CD pipelines, automated deployments, and implemented robust testing workflows for production reliability.

Software Engineer | EY (Ernst & Young) - Hoboken, NJ | Jan 2017 - Mar 2022

- Engineered client-facing SaaS platforms using React, Node.js, SQL, and AWS within highly regulated enterprise environments. - Delivered full-stack solutions for healthcare, insurance, and financial clients, integrating APIs, dashboards, and reporting systems. - Partnered with cross-functional teams to drive system architecture decisions, backend integrations, and clean frontend development. - Conducted code reviews, maintained production systems, and applied security standards across SaaS platforms.
